Aug 2020 – Apr 2024

PROJECTS

Leads Tracker

[Source Code](#)

- Designed and developed a basic chrome extension using **HTML, CSS, and JavaScript**
- It will take the url of the current tab and store in local storage so that we can use it later without searching
- Utilized **responsive design** to ensure compatibility across all devices
- Deployed on Localhost

Weather Website

[Source Code](#)

- Designed and developed a weather website using **HTML, CSS, JavaScript and React.js**
- It uses **Openweathermap** API to fetch data according to city searched
- I have used functional components of react.js and react hooks

Youtube Clone

[Source Code](#)

- Designed an youtube clone using **HTML, CSS, JavaScript and React.js**
- Use **Material UI** to style the components
- I have used **Rapid API** to fetch the youtube video, channel detail, and for searching

EXPERIENCE

I have done internship at **Corizo**. This internship involved developing a fully functional e-commerce website. I have learnt **backend api development** using node and express.js. I have implemented dummy payment gateways using paypal. Applying search engine optimization **SEO** to enhance the searching facility.

ACHIEVEMENTS

- [Solved more than 450 DSA problems on GeeksforGeeks](#)
- [Institute rank 1 for problem solving on geeksforgeeks](#)
